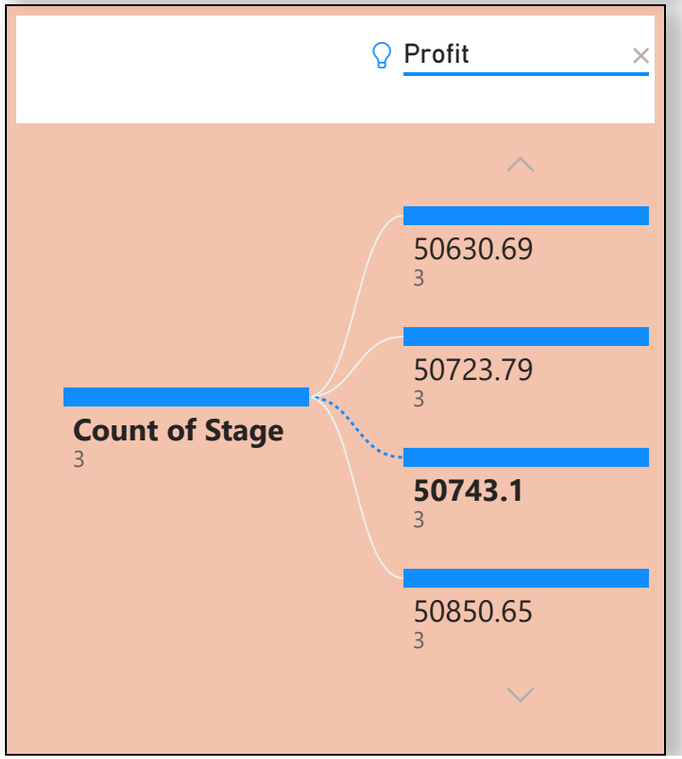
Leads	1,000.00
Visitors	5,000.00



Funnel Analysis – Insights

The funnel starts with **5,000 visitors**, but only **1,000 convert into leads**, indicating a **high drop-off at the initial stage**.
From leads to customers, **4,844 customers are recorded**, suggesting a **very strong conversion rate in the later stage**.
The overall **conversion rate is extremely high (~96.88%)**, which indicates efficient closing but may also suggest **data inconsistency or overlapping definitions**.
The majority of drop-offs occur **between Visitors → Leads**, highlighting a potential issue in attracting or engaging users early.

Performance Summary

- **Visitors → Leads:** Low conversion → needs improvement
- **Leads → Customers:** Very high conversion → strong performance
- **Overall Funnel Efficiency:** Skewed towards later-stage success

Recommendations:

Improve **landing page experience** to convert more visitors into leads
Use **targeted marketing campaigns** to attract quality traffic
Optimize **user engagement strategies** (offers, CTAs, retargeting)
Re-evaluate funnel definitions to ensure **accurate stage representation**
